

Basket mill with pneumatic lifting

NTD has included in its production line a new wide range of basket mills with pneumatic lifting and different power ratings.

Great cost reduction make our
prices very competitive

NTD produces a new wide range of basket mills with pneumatic lifting integrating the latest technology innovations.

Easy operation and innovative design that minimise safety risks and low sound pressure level that reduces fatigue and inconveniences to the operators.

Better design at both functional and aesthetical levels, which provides greater satisfaction to our customers.

Great value for money and excellent performance.
